

nouricia adopts Dièse Finance's Webtaxes SaaS platform for its tax management

nouricia has opted for Webtaxes, the Web-based SaaS solution.
The result: greater efficiency and ease of use.

Lyon, December 21st 2011 – Dièse Finance, the premier provider of SaaS tax solutions, announced today that farming group **nouricia** is using its Webtaxes platform to manage corporate income tax reporting, VAT and motor vehicle tax returns.

An SaaS tax management platform to make life easier

The **nouricia** group manages all of its tax processes through a single platform. With Dièse Finance's Webtaxes solution, **nouricia** generates and electronically files its VAT, motor vehicle tax and corporate income tax returns. **nouricia** was looking for a tax solution that could be rolled out across the group's accounting services, without having to invest in and constantly update software on its PCs. Dièse Finance's Webtaxes SaaS platform was the perfect fit.

"After using client/server tax software for many years, we were won over by Dièse Finance's SaaS solution which has brought us much more flexibility, simplicity and efficiency throughout our two tax-reporting periods, while also remaining extremely reliable," says Sébastien Ciezki, chief financial officer at **nouricia**. *"We no longer need to worry about updating software and all of our accounting personnel can access the application from their Web browser. Tasks are performed concurrently with a very useful validation tool. We are delighted to have opted for an on-demand, Web-based SaaS tax management solution."*

*"We are delighted that the **nouricia** group has renewed its faith in us in deploying Webtaxes,"* adds Benoit Gibert, Dièse Finance CEO. *"The group's accounting personnel were soon up to speed after a short on-site training session. Webtaxes' ultra-intuitive look and feel makes it quick and easy to use."*

About Dièse Finance

A certified EDI partner of the French tax authorities and the Banque de France, and a member of the EDIFICAS association responsible for EDI certification in France, Dièse Finance has been working for more than 10 years with corporations, groups and certified accountants to help them achieve automated, paperless and improved management of their tax flows.

Make Tax Management Simple

Dièse Finance's **Webtaxes** is a Web-based, on-demand SaaS platform with all the features required for filing, e-filing and/or e-payment on line of corporate taxes, covering income tax and consolidated tax reporting, VAT, all local taxes and motor vehicle taxes.

Corporations using **Webtaxes** have a tax platform they can rely on 24/7, accessible through a Web browser and incorporating all the latest changes in tax law. This makes tax reporting processes simpler and more reliable, while ensuring visibility, transparency and traceability for tax authorities.

Dièse Finance is today the leading provider of SaaS tax solutions in France, with a portfolio of nearly 2,000 clients that turn to it for all aspects of automated, paperless tax management. For more information, go to www.diese-finance.com.
